Q4. Read the following case-based passage and answer the following questions.
Rampur was a peaceful village surrounded by a dense forest. The forest not only added to the beauty of the village but also provided the villagers with firewood, fruits, medicinal plants, and clean air. Over the years, the villagers began cutting down trees to expand farmland and build houses. At first, it seemed like a good idea, as they had more land to grow crops and more space to live.
However, things began to change quickly. The rainfall became irregular and the soil started to lose its fertility. Animals that once lived in the forest started entering the village in search of food. Streams that once flowed all year round began to dry up. The villagers noticed that summers were getting hotter and winters shorter. Soon, they realized that cutting down trees had harmed their environment.
Rampur's story is a real example of deforestation – the cutting or removal of trees from a forested area. While trees are cut for wood, farming, and development, deforestation can lead to many problems like soil erosion, loss of biodiversity, changes in climate, and water shortages. The government and villagers are now working together to plant more trees and protect the forest to bring back balance to nature.
1. What was the initial reason the villagers of Rampur cut down trees?
A. To build factories
B. To make paper
C. To expand farmland and build houses
D. To create a zoo

2. Which of the following was NOT mentioned as a consequence of deforestation in Rampur?
A. Increase in soil fertility
B. Irregular rainfall
C. Animals entering the village
D. Drying up of streams

3. What is meant by 'deforestation'?
A. Planting more trees in the forest
B. Cutting down or removal of trees from a forested area
C. Protecting forests from wildfires
D. Using forests only for tourism

4. Why did the villagers of Rampur decide to work with the government?
A. To build a new road
B. To ban farming
C. To plant more trees and protect the forest
D. To stop all village development

5. What environmental change was noticed after deforestation in Rampur?
A. Winters became longer
B. Soil became more fertile
C. Summers got hotter and rainfall became irregular
D. Rivers flooded regularly

Q5. Draw a well-labeled diagram to show 'the parts of a plant'.
